

Candidates standing for Election to Council 2009
Voting will take place during the Biennial Meeting in Dusseldorf

Inge Bernstein: Since 1992 I have enjoyed being a member first of the ICG-group and later InSiGHT as a forum to meet colleagues interested in hereditary gastric cancer and will be pleased to be a council member to do a more specific work for InSiGHT. I am a colorectal surgeon and since 2001 leader of the Danish HNPCC-register. In the last 5 years I have worked on an EC-funded project – INFOBIOMED – with development of IT-tool for electronic exchange of data on HNPCC between different clinical departments and the national HNPCC-database in Denmark.

My main interest as a council member is to offer these experiences to InSiGHT to further improve international collaboration.

Sue Clark: as a colorectal surgeon treating cancer patients I:

- Have an interest in Lynch syndrome, family history assessment, molecular diagnostics and screening
- Provide clinical care for patients with polyposis syndromes
- Have a track record in research, with 2 years full time work on desmoids (winning the Leeds Castle Polyposis Group young researcher of the year prize in 1999), and have a number of ongoing projects
- Am Assistant Director of the St Mark's Hospital Polyposis Registry
- Have attended every LCPG/InSiGHT meeting since 1997
- Am committed to InSiGHT and developing multidisciplinary inherited GI cancer services nationally and internationally.
- Nominators: John Burn, Alan Spigelman

Dr Susan Parry, Gastroenterologist and Clinical Director of the New Zealand (NZ) Familial Gastrointestinal Cancer Registry has been a long-time regular participator and invited faculty member at the InSiGHT meetings.

Dr Parry is a member of the world leading NZ E-cadherin diffuse gastric cancer study group and a principal investigator with the Australasian (NIH) Colorectal Cancer (CRC) Family Study and the Genetics of Serrated Neoplasia Study.

Dr Parry has chaired three government committees on screening for colorectal cancer (CRC) in NZ. Susan strongly supports international collaboration and is pivotally positioned to broaden the reach of InSiGHT into the Asia Pacific region.

Nominators: Finlay Macrae, James Church.

Benedito Mauro Rossi (bmrossi@hcancer.org.br)

Professor and Research Leader

Surgical Oncology Residency Program (1989)

MSc/PhD Program (2005)

Founder (1992) and Coordinator of the Hereditary Colorectal Cancer Registry

A.C.Camargo Hospital – Sao Paulo – Brazil

Main research line: hereditary cancer

Founder (2003) and President Study Group on Hereditary Tumors (www.geth.org.br) Editor-in Chief (2005)

Applied Cancer Research (www.appliedcr.org)
